

Gary Screw & Bolt Company Employee Index

1915 - 1949

The Gary Screw & Bolt Company was a well known early employer in Gary, Indiana. Founded in 1911 by a group of Pittsburgh Screw & Bolt Corporation executives, the local company was located on 20 acres of vacant land along 7th Avenue. With a workforce of less than 100 when it opened in 1912, employment grew to 700 by the 1940s and totaled over 900 by the mid-1950s.

As an important defense contractor during WWII, monthly production reached as much as 4,000 tons of finished bolts, nuts, and rivets, as well as threaded rods and special fasteners. In 1947, a major fire resulted in a 40 percent reduction in plant output; however, by 1951 the company directors authorized a \$1 million modernization and expansion at the Gary plant complex. Gary Screw & Bolt was acquired by the Modulus Division of RBS Industries. Unfortunately, by the 1980s the economic decline resulting from international competition resulted in the company filing for reorganization under Chapter 11 of the US Bankruptcy Code. The plant officially closed on December 31, 1986, and the equipment was sold to a liquidator.

NWIGS is in the process of indexing the names and information included in the employment records from 1915-1949. This index will be useful to those who have family members employed during this period. Please note that those employees listed in this index represent information that is currently available. More surnames are forthcoming as the information is transcribed by volunteers.

For additional information concerning individuals listed in the Gary Screw & Bolt Index, complete the request form on the following website:
